

Quality Assurance Specialist (100%)

Bio-Rad is an innovative company and thanks to its laboratory diagnostic systems, world leader in the field of blood group serology.

Your tasks

- Acting as a QA Specialist, you will be the subject matter expert for one or more QA processes.
- You will guarantee the compliance of these processes to the standards and their appropriate deployment, and will provide support to users. You will monitor their performance through key indicators and be responsible for their continuous improvement.
- As QA business partner, you will be the main contact point of a stakeholder department, help them for any quality topic.
- You evaluate and approve change requests, perform investigations and ensure the follow up of deviations and CAPAs.
- You will conduct internal audits, coordinate the activities for site inspections, and participate in supplier audits.
- You will generate training materials and ensure training sessions related to our quality management system.
- You will manage projects as Project Leader and support others as Quality partner.

Your profile

- You have a Bachelor's Degree, Master's Degree or qualification from a University of Applied Sciences in biology, biotechnology, pharmaceuticals, life sciences or in a closely related field.
- You have 3 to 5 years of professional experience in a similar position in an industry involved in the field of medical device (preferably In vitro diagnostic), pharmaceutical or biotechnological diagnostics.
- You have strong knowledge of the standards ISO 13485 and 14971, as well as the 98/79/EC and FDA requirements.
- You are very familiar with MS Office (Excel, Visio, MS Project, etc.).
- You are capable of analysing complex situations, finding pragmatic solutions and communicating them in a comprehensible manner.
- Excellent knowledge of English, German or French. Another language would be an asset.
- Lean or six sigma certification will be an asset

Our company is involved in the supply of high-quality products and services intended for diagnostic laboratories. Independence, innovation and commitment are the fundamental values that permeate our company culture, as well as a strong orientation towards our customers and a multicultural environment.

If you feel attracted to this unique opportunity and you would like to take on new challenges, we would like to get to know you. Please forward your complete application (application letter, CV, copies of work certificates and diplomas/degrees, etc.) to the address given in the advertisement.
